

<b>Aesthetics &amp; Naturality</b>				
<b>#</b>	<b>Environmental Compatibility Indicator</b>	<b>Yes</b>	<b>Partial</b>	<b>No</b>
1	Is the area near the clubhouse attractively landscaped and maintained?			
2	Is there an appropriately located and attractive facility sign and has the on course signage been designed and maintained attractively?			
3	Does the course seem to be part of the natural landscape and overall contours?			
4	Are pest-resistant and drought-tolerant native trees, shrubs, groundcovers, or their cultivars used in landscaped areas?			
5	Are there "targeted", highly visible areas where flowering annuals or perennials are appropriately maintained?			
6	Are the relative numbers of the prominent deciduous, evergreen, and flowering golf course trees balanced and at least 75% native species?			
7	Are the maintenance facility and the course's miscellaneous "outbuildings" maintained sufficiently and/or screened from view?			
8	Is there an attractive and well-maintained site amenity group (bench, washer, etc.) at least 75% of the tees?			
9	Do the driving range, practice areas, and parking areas present a positive image?			
10	Is the cart barn integrated into the overall landscape plan of the course or the area in which it is located?
